Web Design through Consultel.net

Consultel will create a professional, attractive website with state-of-the-art features proven to increase YOUR clinic's search engine ranking, boost patient scheduling through easy request forms and click-to-call direct dialing. Overall we deliver a better online experience across any device type (desktop, tablet, or mobile).

Our skills are UNIQUE because we bridge creative design with modern programming skills. Too often web developers are "too techie" and can't build attractive sites that should appeal to YOUR targeted demographics -- **young women 13 to 38 years old.**

- Get more patients with an engaging, modern, custom-designed website
- Tap into the 85% of mobile users with a mobile-optimized site - thumb friendly, larger type
- Establish your brand in a professional manner with a custom logo
- Easily make web updates on a WordPress or Similiar Website Platform (*Google loves WordPress*)
- Get Google's attention with periodic posts on your very own blog
- Make it easier for patients to schedule an appointment with an online form or click-to-call button
- Get a competitive edge with a multilingual website - potentially a 400% increase in new patients
- View website traffic results with the use of Google Analytics Tracking Code
- Improve organic search engine optimization (SEO) with keyword meta tag integration

Fees: Starting at \$2,300 up to \$3,800. Call for an estimate.
